DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-11 are rejected under 35 U.S.C. 102(a) as being anticipated by de Waard et al. Note column 8 in de Waard et al sets forth a master slave type arrangement which would in effect comprise a main computational unit and a sub computational units , PID controllers, as claimed. de Waard et al teach multi zone control as claimed and includes offset as per claim 3 , see column 23.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yich et al and Lynch are cited for disclosing temperature control systems of interest.
